

OBC 2021

Outcome-Based Contracting Conference 2021

Towards Better Security Outcomes

Cassia Meeting Room, Level 3,
Marina Bay Sands Singapore

26 November 2021
9.30am - 6pm

Today, outcome-based security contracting is an extremely crucial part of Singapore's Digital Transformation roadmap.

In keeping overheads low, security organisations and consultants are looking to develop risk-mitigation and assessment plans, as well as focusing on up-skilling their security personnel for the digital economy. The OBC 2021 Conference brings together 7 experts to advocate the rationale for adopting OBC, The How's and What's in measuring the cost of its implementation, as well as real-live illustrations of case studies in the residential, commercial and industrial settings. This is a must attend event for all security agencies and professionals to be in sync with the current Security ITM we are threading.

Speakers

**Mohammad
Iskandar**

Leo Lee
